

The Missouri Petroleum Storage Tank Insurance Fund (PSTIF)

How PSTIF Can Work for You

PSTIF funding may be currently available for *Your* storage tank Site.

If you are the current or past owner of a property that has sustained a documented release from an underground or above ground storage tank (UST/AST) you may be eligible for funding for investigation and cleanup activities under the rules of the State of Missouri PSTIF.

Under current federal and state law, owners of USTs that store hazardous materials are liable for damages resulting from unexpected releases. Local and state agencies that provide oversight for environmental damages resulting from releases may require you to perform certain measures to investigate and cleanup environmental contamination resulting from these releases.

Missouri state law established the Missouri Petroleum Storage Tank Insurance Fund to assist tank owners with funding for cleanup operations required by regulating bodies

Apex Envirotech, Inc. has a proven track record and experience working with eligible individuals and businesses to obtain PSTIF funding and complete required investigations and cleanup activities to the satisfaction of the State of Missouri and PSTIF. The ultimate goal is to take the subject property from being an environmental liability back to a real estate asset.

UST Release

The Missouri Petroleum Storage Tank Insurance Fund was established in 1989 in response to federal regulations requiring owners and operators to have financial funding available to cleanup contamination resulting from releases from above ground and underground storage tanks.

Since the conception of PSTIF it has provided funding for numerous UST sites. PSTIF works closely with the Missouri Department of Natural Resources (MDNR) to establish cleanup objectives and bring sites to closure.

Apex provides a single source to accomplish all tasks required by MDNR and PSTIF. Apex can perform and manage all aspects of environmental site assessment, remediation and applications for reimbursement. Apex's primary goal is the satisfaction of our clients while moving their sites to closure in a timely and cost effective manner.

- Apex designs ways to reduce petroleum in soil and groundwater
- Apex will fill in needed information required for case closure
- Apex works to find creative and workable solutions with regulators!

Apex Envirotech, Inc. is a full service environmental consulting firm that offers these services

- Spill Prevention Control & Countermeasure Plans
- Project Management
